Little Farm: Planet of the Sun is a fast-paced space puzzle game, taking place in a solar system of four giant planets in the midst of a supernova. This solar system is also the home to a handful of other planets, but none of them can be discovered and claimed with certainty, given the rate of planetary activity. Because of this, the time has come to discover these secrets, explore the solar system and find a planet which will sustain human life. The objective of the game is to pilot your ship across the star system, delivering as many plasma fragments as possible to the different solar systems in order to save dying suns. You are the last hope in a dark universe, and this is your destiny. Art Style & Sound: The game's art style is taken from the western world with strong graphics, bright colors and a variety of characters. The soundtrack, which is not available with the purchased game, features music which will leave you completely immersed while you play. The sound of the stars collapsing into their distant suns and the crunch of the asteroids as they crash into your ship will leave you feeling rather out of sorts. Support for 3G Features: Gesture controls for device support on iOS devices. Designed for iOS 4.2 or later Full Controller Support The game runs optimised for controllers, but you can also use a mouse or gamepad for ultimate control. Solar MinersCollecting the perfect energy ball is an important part of the mining process. You get to collect this ball through Solar Miner Rush. You do this by using the skill that you upgrade during the game. You will face different enemies and obstacles that can be put to work for you. Another part of the game is that you upgrade your abilities through life points. The object of the game is to collect more Solar Energy. Note that this game requires a secure internet connection to upgrade your skills. You can't wait until the next update comes. You have to upgrade your skills from the secure network that our app provides. Solar Miner Rush is an easy to play, addictive game. However, it becomes far more complex to play once you upgrade your skills. Solar Miner Rush is a game that we designed to be a shorter and simpler game, but we have updated it with features that will make the game more challenging. The game is also an online game. We have setup a secure, free network to help you upgrade your skills during the game, so that you have a minimum of inconvenience

**Last Updated on December 23rd, 2015 at 06:56 am Truth behind the hype! ...or at least a good portion of it! Bring new life to your fantasy games with the Sci-fi Species Collection by Fantasy Grounds. This amazing sci-fi pack contains six brand new species, bringing new life to your Cosmo games. Whether you've got weird spaceships flying in your games, or otherworldly conspiracy's running amok in your campaigns, these new species will be sure to bring the substance and scope you're looking for in your projects. Contents Collection Contents: Hunter The Hunter species have been hard at work harvesting all of their colleagues' human DNA for years. They are instrumental in harvesting the DNA from areal soil samples. Curiously, many of the people they encounter lack a sense of smell or taste, possessing taste buds of a strange kind. Hunters prefer an abundance of spicy hors d'oeuvres. They are the perfect cross between a werewolf, and a werecat. The tag has been removed from the Hunter, but it has been replaced with a hex. The Hunter Hex will place a Small, highly paranoid werehunter as the GM's player character which the GM can then utilize to move the encounter in any direction (up, down, left, right) of his choosing. Yog, the Skeleton-Eater Yog was the ancient leader of a tribal people who lived among the scrolls and branches of the forest. He, the Tribunal, and the End'he were the people that eluded religions, theists, and other fringe sects, seeking a more idealistic path to the next world. But somehow the Stalker tracked them down, driven by his own distorted world view and needs, bringing them down in the short course of days. Yog first and unsurprisingly died, and the End'he had been captured and became the prey of a ritual intended to prolong the existence of the lesser human race, as long as doing so allowed the presence of the End'he. He now hung on, with the Stalker as his bodyguard, fighting the odds and the efforts of the Huntresses for the next two seasons, before his life finally ended, but it was not an easy death. His body was incinerated with the other Stalker long before the final day, his mind locked away for all eternity. The**
