
adminte.com link: Q: using plsql function for two tables I have two tables like below [Table:1] (id varchar2(255) gender varchar2(255) name1 varchar2(255)) [Table:2] (gender varchar2(255) name1 varchar2(255) name2 varchar2(255)) I want to fetch all data from table 1 which is store in table 2. For this I tried select e1.id, e1.gender, e1.name1 from table1 e1, table2 e2 where e1.id = e2.id But this give me exception ORA-00904: "E2.ID": invalid identifier Please anyone tell me how to resolve this. A: you can just do JOIN, like below, select * from table1 e1 join table2 e2 on e1.id = e2.id Donald Trump's new joint tax plan is a joke, and a shameful one at that. It is a blatant giveaway to the billionaire class that has stolen the American economy, rigged markets, and put our democracy on the verge of collapse. And it doesn't pass the laugh test. Trump's plan is not a serious proposal that will get to the root of the real problems of America, which are not corporate profits and tax dodges but the oligarchy's control of money, politics and policy 0cc13bf012

True Trackers 2017 Boujou 2013 Cilium User Manual Dundee United Midfielder Malcolm Forster to reject offer from Motherwell FC after four-year spell there Only time will tell whether the top flight can coax something out of him and United will have to hope that he can. .
